Abstract

Extended distribution of to Himachal Pradesh (India) for two leguminous species \( \textit{Crotalaria medicagenia} \) var. \( \textit{neglecta} \) (Wight & Arnott) Baker, and \( \textit{C. sessiliflora} \) var. \( \textit{sessiliflora} \) f. \( \textit{garhwalensis} \) Ansari & Thothathri, collected from the Sirmour District, has been recorded in this article.

Key words: \( \textit{Crotalaria} \), new records, Himachal Pradesh

INTRODUCTION

During floristic survey in Sirmour District of Himachal Pradesh, \( \textit{Crotalaria medicagenia} \) var. \( \textit{neglecta} \) and \( \textit{C. sessiliflora} \) var. \( \textit{sessiliflora} \) f. \( \textit{garhwalensis} \), have been collected and identified in consultation with authenticated specimens and relevant literature at Botanical Survey of India (BSD), Forest Research Institute, Dehra Dun (DD) and Wildlife Institute of India, Dehra Dun (WII). These species have not so far been recorded in literature dealing with the Flora of Himachal Pradesh (Collett 1902; Nair 1977; Polunin & Stainton 1984a,b; Murti & Uniyal 1985; Singh & Nath 1987; Aswal & Mehrotra 1994; Sharma & Singh 1996; Sharma & Dhaliwal 1997; Dhaliwal & Sharma 1999; Singh & Rawat 2000; Kaur & Sharma 2004; Singh & Sharma 2006; Ansari 2008; Pusalkar & Singh 2008). So, the present record of these two taxa forms the new record for the state flora of Himachal Pradesh in India. The distribution of these two species is plotted in Plate I, Figure G.

ENUMERATION

Flowering & Fruiting: August – November.

Habitat & Ecology: Commonly restricted to drier parts, also in hilly area on road sides vegetation; up to 2000 m.

Distribution: India (Tamil Nadu, Karnataka, Andhra Pradesh and now in Himachal Pradesh); Endemic. [Plate – I; Figure G]
PLATE – I: A. Habit of Crotalaria sessiliflora var. sessiliflora f. garhwalensis (Csg); B. Close-up of pods with persistent calyx of Csg; C. Flower of Csg; D. Habit of Crotalaria medicaginea var. neglecta (Cmn); E. Close-up of flower of Cmn; F. Twig with globose pods in Cmn; G. Distribution map for the two species

**Flowering & Fruiting**: October

**Habitat & Ecology**: Cut slopes in hilly areas on; open vegetation up to 1700 m.

**Specimens cited**: Himachal Pradesh, Sirmour district, Pubyana (Rajgrah), 14.09.2012, Subramaniam 500, Subramaniam 5005.

**Distribution**: India (Uttarakhand and now in Himachal Pradesh); Endemic. [Plate – I; Figure G]

**Acknowledgements**

We thanks Prof. Arun K. Pandey for going through the manuscript and late Shri Krishan Lal of Himachal Pradesh PWD, Sangrah, Sirmaur for his help during field work.

**LITERATURE CITED**

Pleione

Note to the Contributors:

Pleione is one half-yearly peer reviewed international journal that publishes on 30th June and 31st December every year. Pleione is intended to publish works on the vascular plants of the Himalayan region. However, for revisions and monographs the taxon may be with wide distribution but that should cover this region. Apart from the special invited articles, other types include Full Research Articles, New Taxa, New Reports (3 - 4 pages), Notes (max. 2 pages) and Book Reviews (1 page).

Authors may refer the latest issue of the journal for the format. However, it will follow like this: Title (upper/lower; 14 font size), Authors (upper/lower; 11 font size), Address (with PIN & e-mail; 9 font size), Abstract (short; 9 font size), Keywords (9 font size), Introduction, Methodology, Results, Discussion, Conclusion, Acknowledgements (if any) and Literature Cited (all in 11 font size). Results may be presented either in tables or in graphs.

Tables should be typed using ‘Table’ format in MSWORD and not just by using the ‘Tab-key’ of key board. All tables, figures, photos, maps etc. are to be properly numbered and with proper legends/ captions. Publication in Pleione is not free of cost. Authors are requested to avoid colored graphs and/or photographs as those will increase the production cost and the extra cost will be charged to the author.

Keys should be strictly dichotomous and numbered. Authors should avoid preparing Keys using just single character or invisible or difficult characters. During floristic enumeration protologue references are also expected. All scientific names are to be provided with proper author citation. Author citation should be complete and protologue references must be clearly understandable. Basionyms wherever applicable are to be provided.

For references following style is to be maintained:

Please do not send PDF files. Original soft copies of photographs are expected for final plate setting. Matters should be submitted in MSWORD typed in Times New Roman, in CDs or by e-mail to [do not send hard copies unless asked for]:

The Editor

Or, to taxoclub@gmail.com or apd_taxo@yahoo.com

All articles will be referred to at least one referee and future actions on the paper will be based on referee’s report.

At least the corresponding author is to be a Member of the East Himalayan Society for Spermatophyte Taxonomy. However, we suggest all authors are to be members.

The corresponding author will get a copy of the journal free of cost but is to purchase at least 25 copies of reprints. The price of reprints will be calculated based on the production cost only.

Category of Membership: Natural Member/ Life Member/ Annual Member

To
The Secretary, East Himalayan Society for Spermatophyte Taxonomy [TaxoClub], Department of Botany, University of North Bengal, P.O.: North Bengal University, Siliguri 734013, India

Sir,
Kindly enroll me as a Natural/ Life/ Annual Member of the East Himalayan Society for Spermatophyte Taxonomy. I agree to abide by the rules and regulations of the Society. Enclosing a Draft/ Cheque No. ............. dated ............... for ₹ .................

Place:

Signature
Date:

Membership to the Society for India, Nepal and Bhutan [with effect from 01.01.2011]:

<table>
<thead>
<tr>
<th>Type of Member</th>
<th>Membership [in ₹]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Annual Member</td>
<td>₹ 500.00 (for 12 months)</td>
</tr>
<tr>
<td>Life Member</td>
<td>₹ 2500.00</td>
</tr>
<tr>
<td>Natural Member*</td>
<td>₹ 3000.00</td>
</tr>
</tbody>
</table>

An admission fee of ₹100.00 will be charged for new members of all categories

Foreign: USD 700 for Natural Member; USD 600 for Life Member; USD 100 for Annual Member

Note 1: A colourful Membership Certificate will be issued to the Natural Members.

Note 2: Subscription/ Membership may be paid by Cash/ Draft/ Cheque preferably on State Bank of India, NBU-Campus Branch in favour of East Himalayan Society for Spermatophyte Taxonomy. Outstation Indian cheques should add Rs.60.00 (not applicable for multicity cheques) and the foreign cheques should add USD 5.00 as Bank charges.

Note 3: All Members of TaxoClub will receive copies of Pleione free-of-cost.
